Reading: Resources for completing labs

*Qwiklabs has updated their terms of services to include an **age requirement of 18+ to use the platform**, in order to comply with regulations in the US and EU. Learners without access to Qwiklabs are still able to complete the certification and gain the badge by reviewing the Qwiklab instructions, exemplars, and participating in other hands-on activities throughout the certificate. This participation is essential to understanding the certificate's concepts and preparing learners for graded assessments.*

This course features hands-on lab activities where you'll have the opportunity to practice what you've learned so far. You'll use a platform called Qwiklabs to complete these labs. In this reading, you'll learn how to use Qwiklabs.

How to use Qwiklabs

Start Lab button

On the Qwiklabs page, you must click **Start Lab** to open a temporary terminal. The instructions for the lab will move to the right side of the screen.

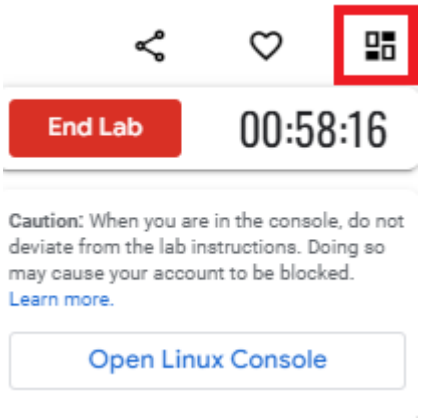

Read the instructions and complete all the tasks in the lab by entering commands in the terminal.

Note: It may take a moment for the terminal to start.

Lab control dialog box

After you click **Start Lab**, the lab control dialog box opens. It contains the **End Lab** button, the **timer**, and the Open **Linux Console** button.

You can hide or unhide the dialog box by clicking the following icon in the red box:

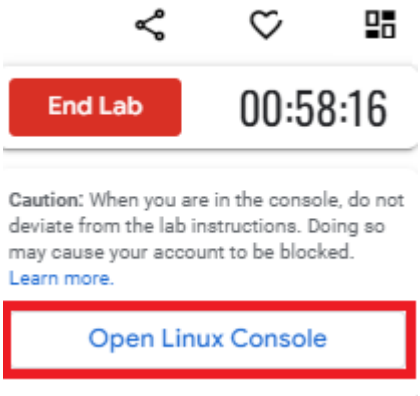

The timer

The **timer** starts when the terminal has loaded. The timer keeps track of the amount of time you have left to complete a lab. The timer counts down until it reaches 00:00:00. When it does, your temporary terminal and resources are deleted.

You will have ample time to complete the labs. But, stay focused on completing the tasks to ensure you use your time well.

Open Linux Console button

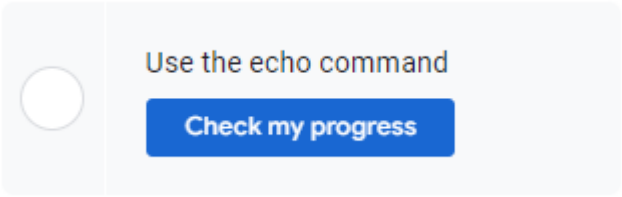

When you click the button to **Open Linux Console**, the terminal opens in a new browser window:

Use this feature if you want a full-screen view of the terminal. You can close this window at any time. Closing the window does not end your lab, and you can continue working in the terminal in the original tab.

Check progress

You can check your progress by clicking **Check my progress** at the end of each task.

If you haven't yet completed a task, you'll receive hints on what you must do to complete it.

You can click **Check my progress** whenever you want to check the completion status of a task or receive a hint.

Using copy/paste commands

The first time you try to use copy or paste keyboard shortcuts (such as **CTRL + C**), you'll receive a pop-up requesting permission to use your device's clipboard: "**cloudskillsboost.google wants to see text and images copied to the clipboard.**"

Please click **Allow** if you would like to be able to use these shortcuts in the Qwiklabs platform. If you choose not to allow Qwiklabs access to your clipboard, you cannot use keyboard shortcuts but you can still complete the lab.

Code block

Certain steps may include a code block. Click the copy button to copy the code provided and then paste it into the terminal.

To paste code or other text content that you have copied from the instructions into the terminal, activate the terminal by clicking anywhere inside it. The terminal is active when the cursor in the terminal changes from a static empty outline to a flashing solid block.

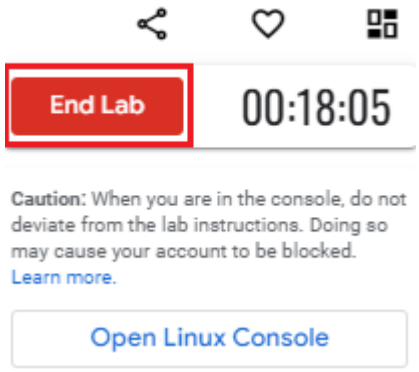

Once the terminal is active, use the keyboard shortcut **CTRL + V** (hold down the **CTRL** key and press the **V** key) to insert the copied text into the terminal at the location of the flashing cursor.

Scrolling

In certain situations, you may want to scroll within the terminal window. To do so, use the scroll wheel on your mouse or the touchpad of your computer.

End Lab button

Finally, click **End Lab** when you've completed the tasks in the lab.

Note: Don't click **End Lab** until you're finished; you'll lose access to the work you've done throughout the lab.

Key takeaways

Knowing how to navigate Qwiklabs will be useful as you complete the labs throughout this course. These labs can help you practice what you've learned in an interactive environment.
