Introduction to Google Security Operations (SIEM)

Hyperlinks

Module 1: Fundamentals

- **Lesson 3 (UDM Overview)**
    - Unified Date Model (UDM) field list | Google SecOps

Module 2: Data Ingestion & Collection

- **Lesson 1: Data Collection Using Direct Ingestion**
    - Ingest Google Cloud data to Google SecOps
    - Send Google Workspace data to Google SecOps
- **Lesson 2—5: APIs, Storage, and Streaming**
    - Chronicle Feed Management API Reference
    - Note: Used for Third-Party APIs, Cloud Storage, and Streaming.
    - Supported log types and default parsers (Lesson 3)
    - Chronicle Feed Management API | Google Security Operations
- **Lesson 7 and 8: BindPlane Deployment Integration**
    - Bindplane Cloud Overview
    - Configuring the 'HTTPS' (Dataplane API) Protocol

    - Bindplane Processors Reference
- **Lesson 11: RBAC and Deployment**
    - Impact of data RBAC on Google SecOps features
- **Lesson 16: Data Manipulation**
    - UDM Field List (Formatting and Mapping)
- **Lesson 18: Parser Management**
    - Google SecOps CLI User Guide

Module 4: Visualization

- **Lesson 1 (Dashboards Introduction & Curated Content)**
    - Dashboards overview | Google SecOps
