Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Alert Types with a Detection Time of Timestamp

6.2.0

The following Machine Learning (ML) alert types or subtypes have a detection time of timestamp:

- Abnormal Parent / Child Process, Subtype: Machine Learning Anomaly Detection
- Account Creation Anomaly
- Application Usage Anomaly
- Bad Destination Reputation Anomaly
- Bad Source Reputation Anomaly
- Carbon Black:XDR Anomaly
- Cloud Drive Data Exfiltration Anomaly
- Command & Control Reputation Anomaly
- Command Anomaly
- Cryptojacking
- CylanceOPTICS:XDR Anomaly
- Data Ingestion Volume Anomaly
- DGA
- DHCP Server Anomaly
- DNS Tunneling Anomaly
- Encoded PowerShell
- Encrypted C&C
- Exploited C&C Connection
- External Brute-Forced Successful User Login
- External Exploited Vulnerability
- External Firewall Denial Anomaly

- External Firewall Policy Anomaly
- External Handshake F[illegible]e
- External IDS Signature Spike
- External IP / Port Scan Anomaly, Subtype: Connection Spike Anomaly (Firewall / Windows Traffic)
- External Non-Standard Port Anomaly
- External Other Malware
- External Password Spraying
- External PII Leaked
- External Plain Text Passwords Detected
- External PUA
- External Ransomware
- External RDP BlueKeep
- External RDP Brute Force Attack
- External Scanner Behavior Anomaly
- External SMB Read Anomaly
- External SMB Username Enumeration
- External SMB Write Anomaly
- External Spyware
- External SQL Anomaly
- External SQL Shell Command
- External Suspected Malicious User Agent
- External SYN Flood Attacker
- External SYN Flood Victim
- External Trojan
- External User Application Usage Anomaly
- External User Data Volume Anomaly
- File Action Anomaly
- File Creation Anomaly
- Hydra Password Guessing Hack Tool
- ICMP Based Exfiltration or Tunneling
- Internal Brute-Forced Successful User Login
- Internal Exploited Vulnerability
- Internal Firewall Denial Anomaly

- Internal Firewall Policy Anomaly
- Internal IDS Signature Spike
- Internal IP / Port Scan Anomaly, Subtype: Connection Spike Anomaly (Firewall / Windows Traffic)
- Internal Non-Standard Port Anomaly
- Internal Other Malware
- Internal Password Spraying
- Internal PII Leaked
- Internal PUA
- Internal Ransomware
- Internal RDP BlueKeep
- Internal RDP Brute Force Attack
- Internal RDP Suspicious Outbound
- Internal Scanner Behavior Anomaly
- Internal SMB Read Anomaly
- Internal SMB Username Enumeration
- Internal SMB Write Anomaly
- Internal Spyware
- Internal SQL Anomaly
- Internal SQL Dumpfile Execution
- Internal Suspected Malicious User Agent
- Internal SYN Flood Attacker
- Internal SYN Flood Victim
- Internal Trojan
- Internal User Application Usage Anomaly
- Internal User Data Volume Anomaly
- Long App Session Anomaly
- Mimikatz DCSync
- Outbound Destination Country Anomaly
- Outbytes Anomaly
- Password Cracking with Hashcat
- Password Resets Anomaly
- Password Spraying Attempts Using Dsacls
- Phishing URL

- Possible Phishing Site Visit from Email
- Private to Private Exploit Anomaly
- Private to Private IPS Signature Spike
- Private to Public Exploit Anomaly
- Private to Public IPS Signature Spike
- Process Anomaly
- Public to Private Exploit Anomaly
- Public to Private IPS Signature Spike
- Public to Public Exploit Anomaly
- Public to Public IPS Signature Spike
- RDP Outbytes Anomaly
- Scanner Reputation Anomaly
- Sensor Status Anomaly
- Suspected AS-REP Roasting Attacks
- Suspected Network Beaconing Activities
- Suspicious LDAP Search Request
- Unapproved Asset Activity
- Uncommon Application Anomaly
- Uncommon Process Anomaly
- Uncommon Top-Level Domain Anomaly
- User Asset Access Anomaly
- User Process Usage Anomaly
- WAF Internal Attacker Anomaly
- WAF Rule Violation Anomaly
