Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Analyst View

The **Dashboards | PREDEFINED | Analyst View** provides a simple table listing all of the events in a specified time frame. It provides a simple view to make it easy for you to focus on the events that are important to you.

You can investigate the most urgent event and then easily move to the next item in the list.

Note that when you navigate into and away from this dashboard, certain filters such as Event Status are deselected.
