Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Configuring Azure AD B2C SSO

The following sections provide guidance for configuring Azure AD B2C to support SSO with Stellar Cyber.

The order in which you perform certain steps matters. Perform the steps in the order shown.

- Prepare Details for Policy / Key Configuration
- Configure & Upload Policies / Keys
- Prepare / Configure Users in Azure AD B2C
- Complete Configurations on Stellar Cyber

Refer to the following Microsoft documentation for additional details:

- Register a SAML application in Azure AD B2C
- Configure SAML identity provider options with Azure Active Directory B2C
