Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Configuring Sensors and Log Sources

Stellar Cyber ingests data from a variety of sources. For ingesting log data through a parser, refer to the topics below on sensors, receivers, sensor profiles, and log parsing

- **Using the Sensor Overview**
- **Sensor Details**
- **Sensor CLI Access Window**
- **About Receivers**
- **Configuring Sensor Profiles**
  - Configuring Modular Sensor Profiles
  - Configuring Standard Sensor Profiles
  - Templates for Windows Server Sensors
- **Configuring a Data Aggregator**
- **Using the Sensor Installation Page**
- **Server Sensor Update Behavior through an Aggregator**
- **Configuring AWS Port Mirroring**
- **Configuring GCP Packet Mirroring**
- **Configuring Windows to Identify Who Deleted Files**
- **Forwarding Malware to an External HTTPS Server**
