Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Machine Learning Alert Types by Index

The ML models operate on different indices to produce alerts. Following are the types of alerts by index:

- Alert Types using the AWS index
- Alert Types using the IDPS/Malware Sandbox Events index
- Alert Types using the Linux index
- Alert Types using the Scan index
- Alert Types using the Sensor Monitoring index
- Alert Types using the Syslog index
- Alert Types using the Traffic index
- Alert Types using the Windows index
