Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Operational View

The **Dashboards | PREDEFINED | Operational View** dashboard provides a quick view of alerts, their status, and who's working on them. You can use this view to monitor and can also customize the charts (add, remove, change to alternate chart, and resize). The charts at the top of the page give you a quick overview of the events, their status, the changes to their status, and who's making those changes. At the bottom of the page is a list of the events.

Note that when you navigate into and away from this view, certain filters such as Event Status are deselected.
