Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Overview of New User Interface 6.2.0

Stellar Cyber has a new user interface. This document describes how to switch themes, the menus and icons in the new user interface, and a mapping of the legacy user interface's menus and menu items to the new user interface's menus and menu items.

See the following:

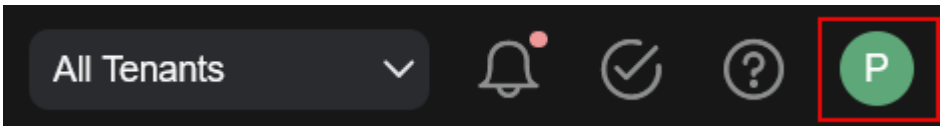

- Switching Themes
- Navigating in the New User Interface
- Mapping the Legacy UI Menu Items to the New UI

Switching Themes

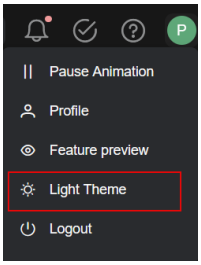

The default is the Dark theme.

To switch themes from Dark to Light or Light to Dark in the new user interface:

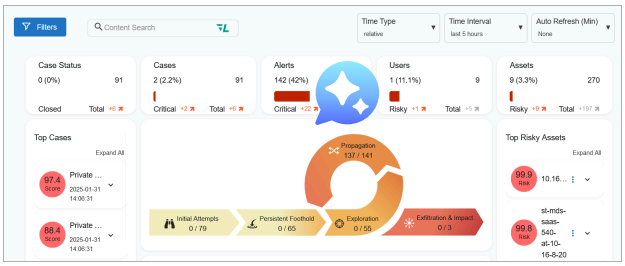

1. Locate the right-most icon in the top right corner of the screen in the new user interface. In this example, it is a P icon.

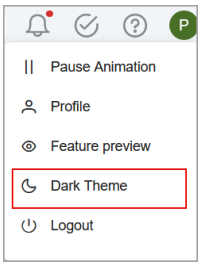

2. Click the right-most icon to view the menu items. In this example, it is a P icon.
3. If you are in Dark Theme, select **Light Theme** to switch to Light Theme.

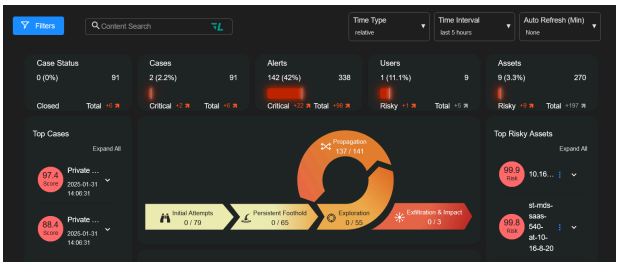

The user interface changes to a light theme.

4. If you are in Light Theme, select **Dark Theme** to switch to Dark Theme.

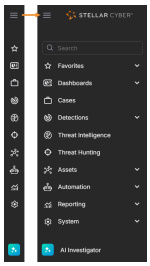

The user interface changes to a dark theme.

Navigating in the New User Interface

The new user interface has icons on the left side of the screen. Select the  icon to expand all the icons into text menus. Once expanded, you can navigate through the menus and use the Search to find specific pages. The menus in the new user interface are described in the sections that follow.

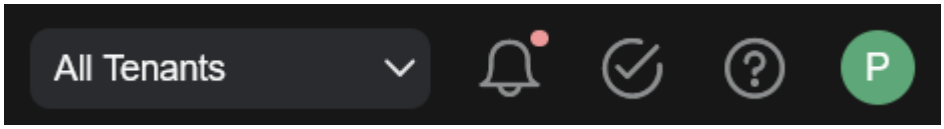

By comparison, the legacy user interface has text menus across the top of the screen, as well as icons on the top right of the screen.

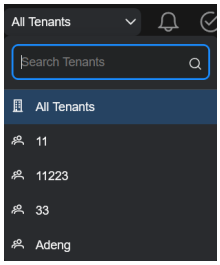

Icons in New UI

The new user interface has icons on the top right of the screen.

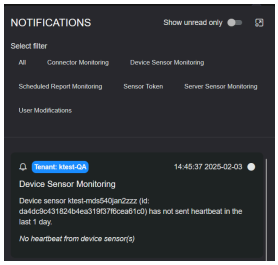

Click **All Tenants** to view the tenants menu items. There is a Search Tenants box and menu items for the names of tenants.

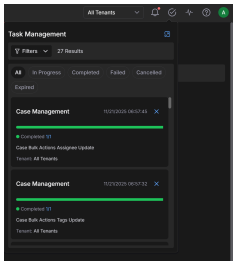

Use the Search Tenants box to search for tenants by name.

Click the icon to open **Notifications**.

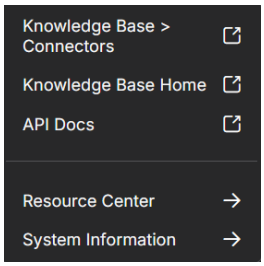

Click the icon to open **Tasks**. (You may not have any tasks.)

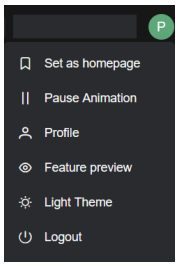

You can also view the Task List as its own page using the **System | Task Management** option.

Click the icon to view the menu items: Knowledge Base <specific article>, Knowledge Base Home, API Docs, Resource Center, and System Information.

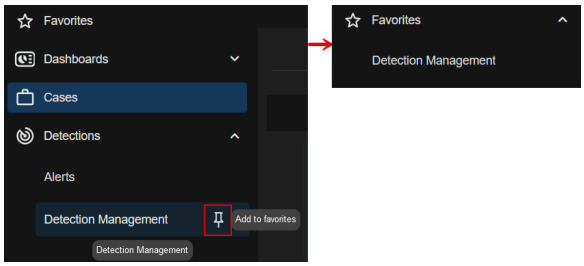

Click the right-most icon to view the menu items: Set/Unset as homepage, Pause Animation, Profile, Feature Preview, Light/Dark Theme, and Logout. In this example, it is a P icon.

Favorites Menu

You can add your favorite menu items to the Favorites or menu. Navigate to a menu item and click the icon.

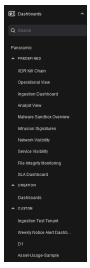

The selected menu item is pinned to Favorites.

Dashboards Menu

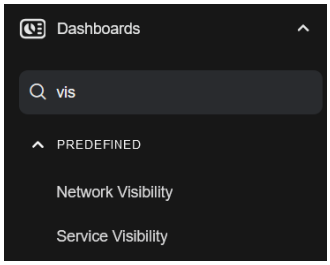

Click the icon to expand Dashboards to view the menu items in the Dashboards or menu. There is a Search box, a menu item for Panoramic, and three sections of menu items: PREDEFINED, CREATION, and CUSTOM.

Click the section headings in all caps to expand or collapse the menus.

Dashboards Search Box

Use the Dashboards Search box to search for menu items within the Dashboards menu. For example, if you search for vis, the search result is as follows.

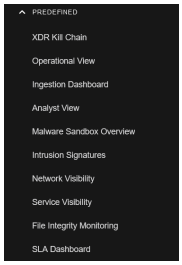

Panoramic

Click Panoramic to access Panoramic views.

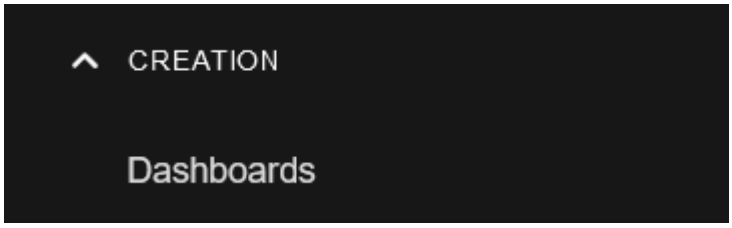

PREDEFINED

Click the icon to expand the PREDEFINED section of the Dashboards menu to view the menu items: XDR Kill Chain, Operational View, Ingestion Dashboard, Analyst View, Malware Sandbox Overview, Intrusion Signatures, Network Visibility, Service Visibility, File Integrity Monitoring, and SLA Dashboard.

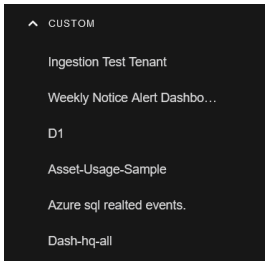

CREATION

Click the icon to expand the CREATION section of the Dashboards menu to view the menu item: Dashboards.

CUSTOM

Click the icon to expand the CUSTOM section of the Dashboards menu to view the names of custom dashboards, such as the following.

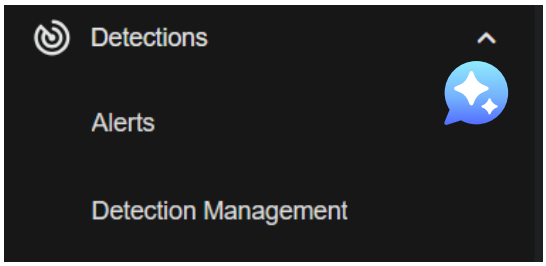

Cases Menu

Click Cases or to go to the **Cases** page. There are no other menu items under the Cases menu.

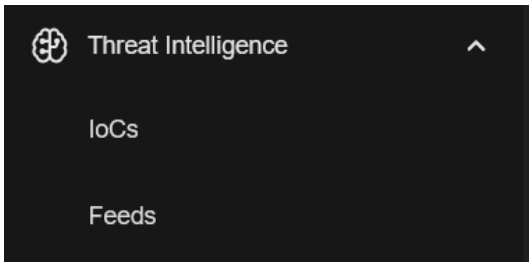

Detections Menu

Click the icon to expand the Detections or menu to view the menu items: Alerts and Detection Management.

Threat Intelligence Menu

Click the icon to expand the Threat Intelligence or menu to view the menu items: IoCs and Feeds.

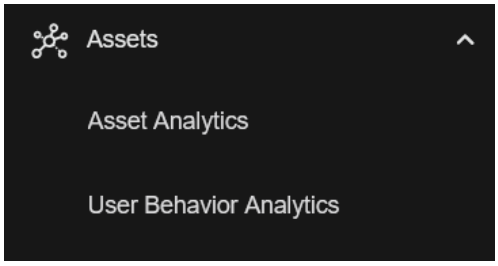

Threat Hunting Menu

Click Threat Hunting or to go to the **Threat Hunting** page. There are no other menu items under the Threat Hunting menu.

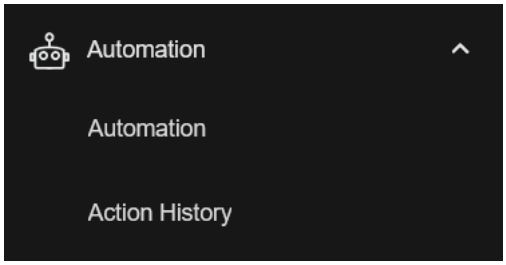

Assets Menu

Click the icon to expand the Assets or menu to view the menu items: Asset Analytics and User Behavior Analytics.

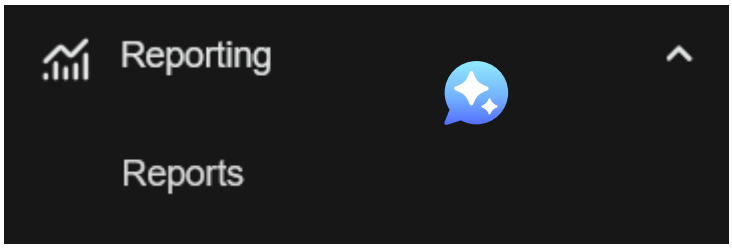

Automation Menu

Click the icon to expand the Automation or menu to view the menu items: Automation and Action History.

Reporting Menu

Click the icon to expand the Reporting or menu to view the menu item: Reports.

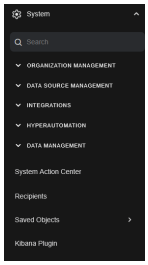

System Menu

Click the icon to expand the System or menu to view the System menu items. There is a Search box and five sections of menu items: ORGANIZATION MANAGEMENT, DATA SOURCE MANAGEMENT, INTEGRATIONS, HYPERAUTOMATION, and DATA MANAGEMENT.

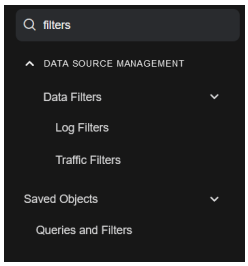

Click the section headings in all caps to expand or collapse the menus.

In addition, there are a few menu items at the bottom of the System menu: System Action Center, Recipients, Saved Objects, and Kibana Plugin.

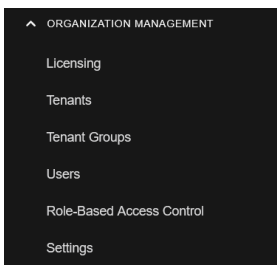

System Search Box

Use the System Search box to search for menu items within the System menu. For example, if you search for filters, the search result is as follows.

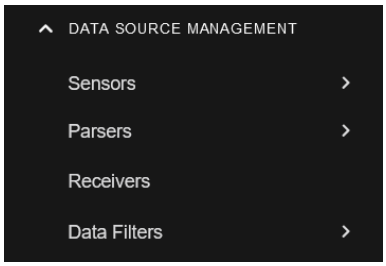

ORGANIZATION MANAGEMENT

Click the icon to expand the ORGANIZATION MANAGEMENT section of the System menu to view the menu items: Licensing, Tenants, Tenant Groups, Users, Role-Based Access Control, and Settings.

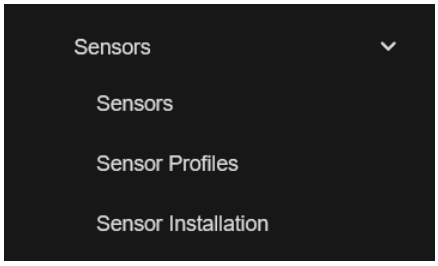

DATA SOURCE MANAGEMENT

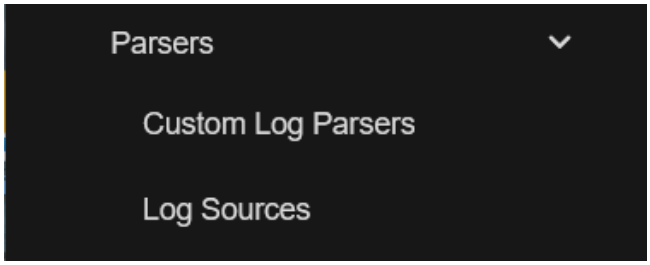

Click the icon to expand the DATA SOURCE MANAGEMENT section of the System menu to view the menu items: Sensors, Parsers, Receivers, and Data Filters.

Click the icon to expand Sensors to view the menu items: Sensors, Sensor Profiles, and Sensor Installation.

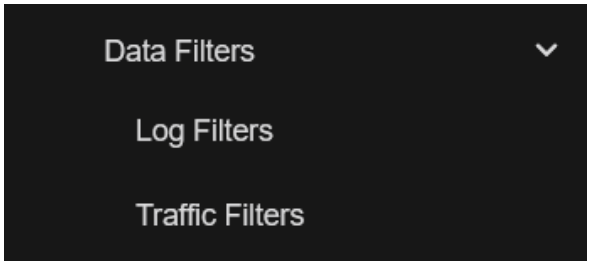

Click the icon to expand Parsers to view the menu items: Custom Log Parsers and Log Sources.

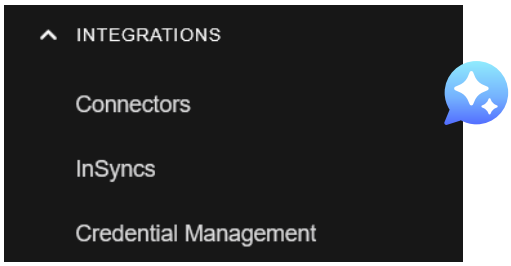

There are no other menu items under Receivers.

Click the icon to expand Data Filters to view the menu items: Log Filters and Traffic Filters.

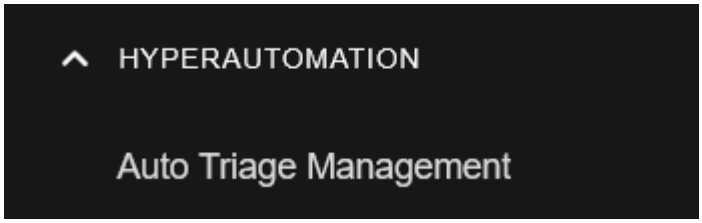

INTEGRATIONS

Click the icon to expand the INTEGRATIONS section of the System menu to view the menu items: Connectors, InSyncs, and Credential Management.

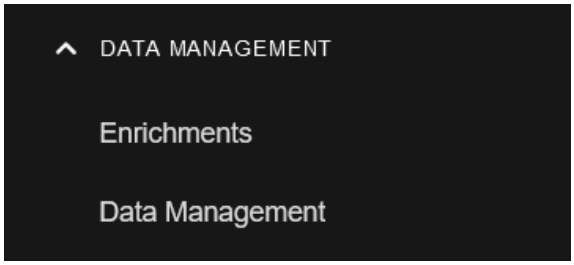

HYPERAUTOMATION

Click the icon to expand the HYPERAUTOMATION section of the System menu to view the menu item: Auto Triage Management.

DATA MANAGEMENT

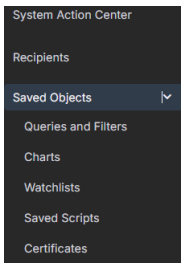

Click the icon to expand the DATA MANAGEMENT section of the System menu to view the menu items: Enrichments and Data Management.

Additional System Menu Items

There are a few additional menu items at the bottom of the System menu: System Action Center, Recipients, Saved Objects, and Kibana Plugin.

Click the icon to expand Saved Objects to view the menu items: Queries and Filters, Charts, Watchlists, Saved Scripts, and Certificates.

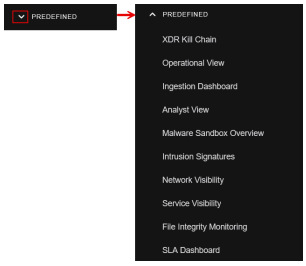

AI Investigator Menu

Click AI Investigator or to go to the **AI Investigator** page. There are no other menu items under AI Investigator.

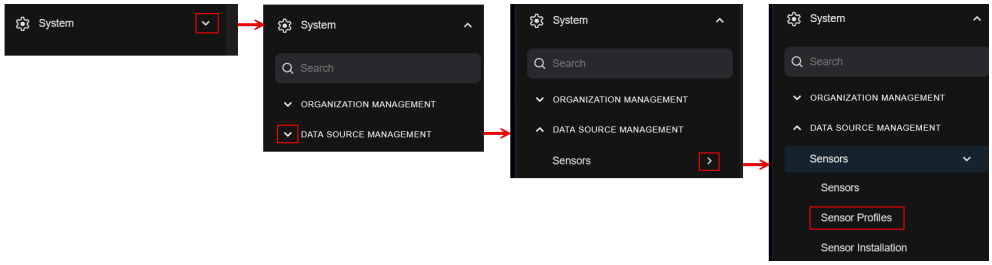

Mapping the Legacy UI Menu Items to the New UI

The table below maps the menus and menu items in the legacy user interface to the menus and menu items in the new user interface.

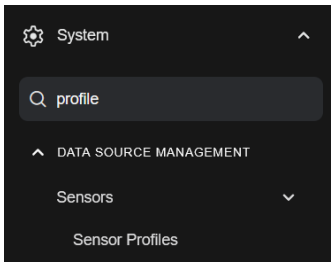

In the legacy user interface, a section heading, such as Predefined under the Visualize menu, was not a selectable part of the path. In the new user interface, a section heading, such as PREDEFINED under the Dashboards menu, is also not a selectable part of the path, however, you may need to click the expand icon to see the menu items under the section heading.

In some cases, you may need to expand multiple items. For example, to select the Sensor Profiles menu item under the System menu, expand System, expand DATA SOURCE MANAGEMENT, and expand Sensors. You can then select Sensor Profiles.

Alternatively, you can use the Search boxes under Dashboards or System to locate a menu item. For example, to find the Sensor Profiles menu item, type profile in the System Search box.

Mapping Table

Legacy User Interface	Section Heading in Legacy UI	New User Interface
AI Investigator		AI Investigator
Cases		Cases
Alerts		Detections | Alerts
Visualize | XDR Kill Chain	Predefined	Dashboards | PREDEFINED | XDR Kill Chain
Visualize | Operational View	Predefined	Dashboards | PREDEFINED | Operational View
Visualize | Ingestion Dashboard	Predefined	Dashboards | PREDEFINED | Ingestion Dashboard

Legacy User Interface	Section Heading in Legacy UI	New User Interface
Visualize | Analyst View	Predefined	Dashboards | PREDEFINED | Analyst View
Visualize | Malware Sandbox Overview	Predefined	Dashboards | PREDEFINED | Malware Sandbox Overview
Visualize | Intrusion Signatures	Predefined	Dashboards | PREDEFINED | Intrusion Signatures
Visualize | Network Visibility	Predefined	Dashboards | PREDEFINED | Network Visibility
Visualize | Service Visibility	Predefined	Dashboards | PREDEFINED | Service Visibility
Visualize | File Integrity Monitoring	Predefined	Dashboards | PREDEFINED | File Integrity Monitoring
Visualize | SLA Dashboard	Predefined	Dashboards | PREDEFINED | SLA Dashboard
Visualize | Dashboards	Creation	Dashboards | CREATION | Dashboards
Visualize | Charts	Creation	System | Saved Objects | Charts
Visualize | <name>	Custom	Dashboards | CUSTOM | <name>
Investigate | Threat Hunting		Threat Hunting
Investigate | Asset Analytics		Assets | Asset Analytics
Investigate | User Behavior Analytics		Assets| User Behavior Analytics
Investigate | Panoramic		Dashboards | Panoramic
Investigate | Kibana Plugin		System | Kibana Plugin
Respond | Automation		Automation | Automation
Respond | Actions		Automation | Action History
Respond | Reports		Reporting | Reports
System | Sensors	Collection	System | DATA SOURCE MANAGEMENT | Sensors | Sensors
System | Sensor Profiles	Collection	System | DATA SOURCE MANAGEMENT | Sensors | Sensor Profiles
System | Receivers	Collection	System | DATA SOURCE MANAGEMENT | Receivers
System | Custom Log Parsers	Collection	System | DATA SOURCE MANAGEMENT | Parsers | Custom Log Parsers
System | Log Filters	Collection	System | DATA SOURCE MANAGEMENT | Data Filters | Log Filters
System | Traffic Filters	Collection	System | DATA SOURCE MANAGEMENT | Data Filters | Traffic Filters

Legacy User Interface	Section Heading in Legacy UI	New User Interface
System | Log Sources	Collection	System | DATA SOURCE MANAGEMENT | Parsers | Log Sources
System | Connectors	Integrations	System | INTEGRATIONS | Connectors
System | Threat Intelligence Platform	Integrations	Threat Intelligence | IoCs Threat Intelligence | Feeds
System | InSyncs	Integrations	System | INTEGRATIONS | InSyncs
System | Enrichments	Data Processor	System | DATA MANAGEMENT | Enrichments
System | Data Management	Data Processor	System | DATA MANAGEMENT | Data Management
System | Detection Management	Detections	Detections | Detection Management
System | Queries and Filters	Configurations	System | Saved Objects | Queries and Filters
System | Recipients	Configurations	System | Recipients
System | Saved Scripts	Configurations	System | Saved Objects | Saved Scripts
System | Lookups	Configurations	System | Saved Objects | Watchlists
System | Sensor Installation	Deployment	System | DATA SOURCE MANAGEMENT | Sensors | Sensor Installation
System | Licensing	Administration	System | ORGANIZATION MANAGEMENT | Licensing
System | ORGANIZATION MANAGEMENT | Role-Based Access Control	Administration	System | ORGANIZATION MANAGEMENT | Role-Based Access Control
System | UsersF	Administration	System | ORGANIZATION MANAGEMENT | Users
System | Tenants	Administration	System | ORGANIZATION MANAGEMENT Tenants
System | Tenant Groups	Administration	System | ORGANIZATION MANAGEMENT | Tenant Groups
System | Settings	Administration	System | ORGANIZATION MANAGEMENT | Settings

Legacy User Interface	Section Heading in Legacy UI	New User Interface
System | Certificates	Administration	System | Saved Objects | Certificates
System | System Action Center	Administration	System | System Action Center
