Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to AWS High-Risk Ports Exposed to Internet Alert 6.5.0

The following rules are used to detect AWS security group rules that expose high-risk ports to the Internet. Any one or more of these will trigger the AWS High-Risk Ports Exposed to Internet Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description

AWS High-Risk Ports Exposed to Internet	Identifies when a specified inbound (ingress) rule is added or adjusted for a VPC security group in AWS EC2 that allows traffic from any IP address to common remote access ports.
