Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Azure DNS Zone Changed Alert

The following rules are used to identify events when an Azure DNS zone is changed. Any one or more of these will trigger the Azure DNS Zone Changed Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description

Azure DNS Zone Modified or Deleted	Identifies when DNS zone is modified or deleted.
	More details
	Rule ID
	`azure_73`
	Query
	`{'selection': {'operationName|startswith': 'MICROSOFT.NETWORK/DNSZONES', 'operationName|endswith': ['/WRITE', '/DELETE']}, 'condition': 'selection'}`

	Severity
	50
	Suppression Logic Based On
	• azure_activity_log.resourceId
	• azure_activity_log.operationName

Title	Description
• stella  _id **Additional Information** **Maturity** test **Creation Date** 2021/08/08 **Risk Level** medium	• DNS zone modified and deleted may be performed by a system administrator. Verify whether the user identity, user agent, and/or hostname should be making changes in your environment. • DNS zone modification from unfamiliar users should be investigated. If known behavior is causing false positives, it can be exempted from the rule.
