Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to DNS Query to External Service Interaction Domains 5.5.0

The following rules are used to identify DNS queries to external service interaction domains often used for out-of-band interactions after successful RCE. Any one or more of these will trigger the DNS Query to External Service Interaction Domains Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description

DNS Query to External Service Interaction Domains	DNS query to external service interaction domains often used for out-of-band interactions after successful RCE.
