Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Microsoft Entra Application Configuration Changes Alert

The following rules are used to identify suspicious Microsoft Entra application configuration changes. Any one or more of these will trigger the Microsoft Entra Application Configuration Changes Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description

Application AppID Uri Configuration Changes	Detects when a configuration change is made to an application's AppID URI.
	More details
	Rule ID
	`azure_16`
	Query
	`{'selection': {'properties_message': ['Update Application', 'Update Service principal']}, 'condition': 'selection'}`
	Log Source
	Stellar Cyber Microsoft Entra Events configured.
	Rule Source
	SigmaHQ,1b45b0d1-773f-4f23-aedc-814b759563b1
	Author: Mark Morowczynski '@markmorow', Bailey Bercik '@baileybercik'
	Tactics, Techniques, and Procedures
	TA0003, T1078.004, TA0006, T1552
	References
	• https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/security-operations-applications#appid-uri-added-modified-or-removed
	Severity
	75
	Suppression Logic Based On
	• azure_ad.initiatedBy.user.id
	• azure_ad.initiatedBy.app.servicePrincipalId

Title	Description
	• s rule_id **Additional Information** **Maturity**: experimental **Creation Date**: 2022/06/02 **Risk Level**: high **False Positives** • When an administrator is making legitimate AppID URI configuration changes to an application. This should be a planned event.

Added Credentials to Existing Application	Detects when a new credential is added to an existing application. Any additional credentials added outside of expected processes could be a malicious actor using those credentials.
	More details
	Rule ID
	`azure_18`
	Query
	`{'selection': {'properties_message': 'Update Service principal/ Update Application'}, 'selection2': {'properties_message|contains|all': ['Update Application', 'Certificates and secrets management']}, 'condition': 'selection or selection2'}`
	Log Source
	Stellar Cyber Microsoft Entra Events configured.
	Rule Source
	SigmaHQ,cbb67ecc-fb70-4467-9350-c910bdf7c628
	Author: Mark Morowczynski '@markmorow', Bailey Bercik '@baileybercik'
	Tactics, Techniques, and Procedures
	TA0003, T1098.001
	References
	• https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/security-operations-applications#application-credentials
	Severity
	75
	Suppression Logic Based On
	• azure_ad.initiatedBy.user.id
	• azure_ad.initiatedBy.app.servicePrincipalId
	• stellar.rule_id
	Additional Information
	Maturity: experimental
	Creation Date: 2022/05/26
	Risk Level: high
	False Positives
	• When credentials are added/removed as part of the normal working hours/workflows

Added Owner to Application	Detects when a new owner is added to an application. This gives that account privileges to make modifications and configuration changes to the application. More details **Rule ID** `azure_23` **Query**

Title	Description
	{'selection': {'properties_message': 'Add owner to application'}, 'condition': 'selection'} **Log Source** Stellar Cyber Microsoft Entra Events configured. **Rule Source** SigmaHQ,74298991-9fc4-460e-a92e-511aa60baec1 Author: Mark Morowczynski '@markmorow', Bailey Bercik '@baileybercik' **Tactics, Techniques, and Procedures** TA0003, T1078.004 **References** • https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/security-operations-applications#new-owner **Severity** 50 **Suppression Logic Based On** • azure_ad.initiatedBy.user.id • azure_ad.initiatedBy.app.servicePrincipalId • stellar.rule_id **Additional Information** **Maturity**: experimental **Creation Date**: 2022/06/02 **Risk Level**: medium **False Positives**: • When a new application owner is added by an administrator
Azure Application Credential Modified	Identifies when an application credential is modified. More details **Rule ID** azure_51 **Query** {'selection': {'properties_message': 'Update application - Certificates and secrets management'}, 'condition': 'selection'} **Log Source** Stellar Cyber Microsoft Entra Events configured. **Rule Source** SigmaHQ,cdeef967-f9a1-4375-90ee-6978c5f23974 Author: Austin Songer @austinsonger **Tactics, Techniques, and Procedures** TA0003, T1098 **References** • https://www.cloud-architekt.net/auditing-of-msi-and-service-principals/ **Severity** 50

Title	Description

Suppression Logic Based On

- azure_ad.initiatedBy.user.id
- azure_ad.initiatedBy.app.servicePrincipalId
- stellar.rule_id

Additional Information

Maturity	Creation Date	Risk Level	False Positives
test	2021/09/02	medium	• Application credential addition may be performed by a system administrator. • Verify whether the user identity, user agent, and/or hostname should be making changes in your environment. • Application credential added from unfamiliar users should be investigated. If known behavior is causing false positives, it can be exempted from the rule.
