Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

# Rules Contributing to Microsoft Entra Hybrid Health AD FS New Server Alert

The following rules are used to identify a new hybrid health AD FS server. Any one or more of these will trigger the Microsoft Entra Hybrid Health AD FS New Server Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

| Title | Description |
| --- | --- |
| Azure Active Directory Hybrid Health AD FS New Server | This detection uses Azure Activity Log (Administrative category) to identify the creation or update of a server instance in a Microsoft Entra Hybrid health AD FS service. A threat actor can create a new Health AD FS service and create a fake server instance to spoof AD FS signing logs. There is no need to compromise an on-prem AD FS server. This can be done programmatically via HTTP requests to Azure.<br><br>More details<br><br>**Rule ID**<br>`azure_55`<br><br>**Query**<br>`{'selection': {'CategoryValue': 'Administrative', 'ResourceId\|contains': 'AdFederationService', 'OperationNameValue': 'Microsoft.ADHybridHealthService/services/servicemembers/action'}, 'condition': 'selection'}`<br><br>**Log Source**<br>Stellar Cyber Microsoft Entra Events configured.<br><br>**Rule Source**<br>SigmaHQ,288a39fc-4914-4831-9ada-270e9dc12cb4<br><br>Author: Roberto Rodriguez (Cyb3rWard0g), OTR (Open Threat Research), MSTIC<br><br>**Tactics, Techniques, and Procedures**<br>TA0007, T1087<br><br>**References**<br>• https://o365blog.com/post/hybridhealthagent/<br><br>**Severity** |

| Title | Description |
