Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Suspicious AWS Root Account Activity Alert

The following rules are used to identify suspicious activity with AWS Root Account. Any one or more of these will trigger the Suspicious AWS Root Account Activity Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description
AWS Root Credentials	Detects AWS root account usage

More details

Rule ID

`aws_12`

Query

```
{'selection1': {'eventSource': 'signin.amazonaws.com'}, 'selection_usertype': {'userIdentity_type': 'Root'}, 'selection_eventtype': {'eventType': 'AwsServiceEvent'}, 'condition': 'selection1 and selection_usertype and not selection_eventtype'}
```

Log Source

Stellar Cyber AWS configured for:

- AWS Cloudtrail

Rule Source

SigmaHQ,8ad1600d-e9dc-4251-b0ee-a65268f29add

Author: vitaliy0x1

Tactics, Techniques, and Procedures

TA0003, T1078.004

References

	Severity
	50
	
	Suppression Logic Based On
	• service_id
	• aws.eventSource
	• aws.eventName
	• stellar.rule_id
	
	Additional Information
	Maturity: production
	Creation Date: 2020/06/11
	Risk Level: medium
	False Positives:
	• It's strongly recommended that the root user is not used for everyday tasks, including the administrative ones. Verify whether the IP address, location, and/or hostname should be logging in as root in your environment. Unfamiliar root logins should be investigated immediately. If known behavior is causing false positives, it can be exempted from the rule.

Root access key created	An access key was created for the root account. More details **Rule ID**

Title	Description

aws_109

Query

```
{'selection1': {'eventSource': 'cloudtrail.amazonaws.com'}, 'selection2': {'userIdentity_type': 'Root'}, 'selection3': {'eventName': 'CreateAccessKey'}, 'condition': 'selection1 and selection2 and selection3'}
```

Log Source

Stellar Cyber AWS configured.
