Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Suspicious Azure Account Permission Elevation Alert

The following rules are used to identify suspicious Azure account permission elevation. Any one or more of these will trigger the Suspicious Azure Account Permission Elevation Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description

Azure Subscription Permission Elevation Via ActivityLogs	Detects when a user has been elevated to manage all Azure Subscriptions. This change should be investigated immediately if it isn't planned. This setting could allow an attacker access to Azure subscriptions in your environment.
