Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Suspicious Azure Deployment Activity Alert

The following rules are used to identify suspicious Azure deployment activity. Any one or more of these will trigger the Suspicious Azure Deployment Activity Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description

Number Of Resource Creation Or Deployment Activities	Number of VM creations or deployment activities occur in Azure via Azure Activity Log.
	
	More details
	
	Rule ID
	
	`azure_48`
	
	Query
	
	`{'selection': {'OperationNameValue': ['Microsoft.Compute/virtualMachines/write', 'Microsoft.Resources/deployments/write']}, 'condition': 'selection'}`
	
	Log Source
	
	Stellar Cyber Microsoft Entra Events configured.
	
	Rule Source
	
	SigmaHQ,d2d901db-7a75-45a1-bc39-0cbf00812192
	
	Author: sawwinnnaung
	
	Tactics, Techniques, and Procedures

	Severity
	25
	
	Suppression Logic Based On
	• azure_activity_log.resourceId
	• azure_activity_log.operationName
	• stellar.rule_id
	
	Additional Information
	Maturity: test
	Creation Date: 2021/08/07
	Risk Level: low
	False Positives:
	• Container Registry being created, updated, or deleted may be performed by a system administrator. Verify whether the user identity, user agent, and/or hostname should be making changes in your environment.
	• Container Registry created, updated, or deleted from unfamiliar users should be investigated. If known behavior is causing false positives, it can be exempted from the rule.
