Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Suspicious OCI Object Storage Activity Alert 6.0.0

This topic covers a feature that is not available for all customers yet. See Early Access Program Features and Topics Under Development.

The following rules are used to identify suspicious object storage activity in OCI. Any one or more of these will trigger the Suspicious OCI Object Storage Activity Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description

OCI Defense Evasion PutObjectLifecyclePolicy	This analytic identifies `PutObjectLifecyclePolicy` events in OCI audit logs where a user has created or replaced an object lifecycle policy for a bucket. This detection leverages OCI logs to identify suspicious lifecycle configurations. This activity is significant because attackers may use it to delete logs quickly, thereby evading detection and impairing forensic investigations. If confirmed malicious, this could allow attackers to cover their tracks, making it difficult to trace their actions and respond to the breach effectively.
