Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Suspicious Windows Network Connection Alert

The following rules are used to identify suspicious Windows network connection activities. Any one or more of these will trigger the Suspicious Windows Network Connection Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Windows Events Required: 3

The Windows Detect Profile (Low Volume) covers these required Windows events.

Title	Description

Network Activity From MSBuild	MSBuild is a powerful tool used to compile and package code. If the MSBuild utility is accessing network resources, it might be using code from a third party or even downloading malicious code or executables. Malicious executables can even run inside of MSBuild with little indication it is doing so.
	
	More details
	
	Rule ID
	`windows_network_connection_1`
	
	Query
	`{'selection': {'EventImage|endswith': '\\MSBuild.exe'}, 'condition': 'selection'}`
	
	Log Source
	Stellar Cyber Windows Server Sensor configured for:
	• Monitoring Windows network connection events
	
	Rule Source
	Developed internally by Stellar Cyber
	
	Tactics, Techniques, and Procedures
	TA0005, T1127
