Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Suspicious Windows Registry Event: Impact Alert

The following rules are used to identify suspicious Windows registry events usually in the impact stage. Any one or more of these will trigger the Suspicious Windows Registry Event: Impact Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Windows Events Required: 13

The Windows Detect Profile (Low Volume) covers these required Windows events.

Title	Description

Potential Ransomware Activity Using LegalNotice Message	Detect changes to the "LegalNoticeCaption" or "LegalNoticeText" registry values where the message set contains keywords often used in ransomware ransom messages
