Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Rules Contributing to Windows Network Access Suspicious desktop.ini Action Alert

The following rules detect suspicious SMB traffic accessing desktop.ini files. Any one or more of these will trigger the Windows Network Access Suspicious desktop.ini Action Alert. Details for each rule can be viewed by clicking the **More Details** link in the description.

Title	Description

Windows Network Access Suspicious desktop.ini Action	Detects unusual processes accessing desktop.ini remotely over network share, which can be leveraged to alter how Explorer displays a folder's content (i.e. renaming files) without changing them on disk.
