Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

Security Monitoring with Stellar Cyber

Stellar Cyber provides many different ways to investigate cyber threats. The topics in this section cover how to run a Security Operations Center with core Stellar Cyber features, including Cases, alerts, automated threat hunting, and dashboards. Use the topics below to learn about these key tools. Also refer to **Getting Started** topics and Response Actions.

- **Using AI Investigator**
- **Working with Cases**
- **Working with Detections**
- **Working with Threat Intelligence**
- **Threat Hunting**
- **Working with Assets**
- **Working with Auto-Triage**
