Stellar Cyber 6.6.0s is now live! Discover all the updates in the release notes!

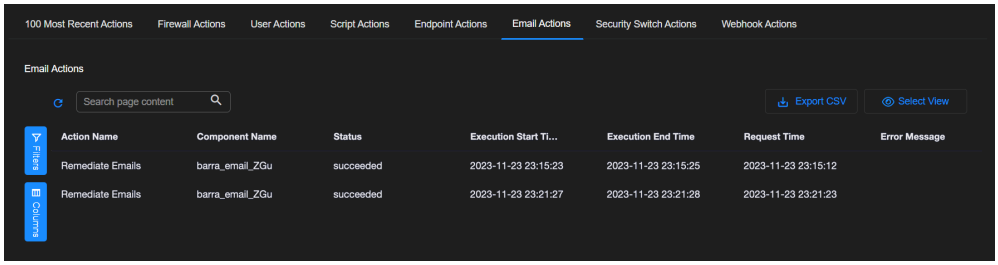

Viewing Email Actions

The **Automation | Action History | Email Actions** tab displays the actions taken manually from the Event Display in response to a detected threat in email traffic. See Creating Remediation Email.

Revert is not applicable for Email actions

Email Actions Table

The **Email Actions** table displays up to 1000 email actions by default.

See the Tables page for more information on working with tables.

The **Status** can be:

- **Waiting**–The action is queued. This should take less than a minute.
- **In Progress** – The action is being communicated to the connector.
- **Succeeded** – The action was successfully implemented.
- **Failed** – The action failed. An **Error Message** relayed from the connector provides details.
- **Expiring** – The action is being removed from the connector.
- **Expired** – The action is no longer active.

Automated Threat Hunting (ATH) email actions do not show in this table. See **Last Status** in Automated Threat Hunting for details.
